

MobileSpaces has partnered with Juniper to change how BYOD is done.

Learn how we boost the power of BYOD in our upcoming coffee break demo & get a \$10 Starbucks gift card to help recharge your workday.

We just need 25 minutes to show how:

1. You can give **Android users** on-demand, per-app VPN connectivity **just like iOS users**
2. BYOD users can **securely access** Microsoft Lync, SharePoint and other services behind the firewall **with just the touch of an app**
3. You can secure **any mobile app** for BYOD without the friction of app wrapping or SDKs

The session starts at 2:00 PM ET / 11:00 AM PT on Wednesday, July 23, 2014. Space is limited to 25 people, so RSVP now!
